(54) PPP RELAY CONNECTION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To enhance the security countermeasures of a public data network in the communication system using the internet as the public data network.

SOLUTION: The system employs the tunneling protocol interface. A relay remote access server 5 is provided with a database 7 that cross-references a domain name on a public data network with a telephone number of a plurality of object RAS, and the relay RAS 5 and the object RAS 8 are connected as required by dial-up connection by means of a telephone number. Thus, a plurality of the object RASs 8 use one relay RAS 5 in common.

LEGAL STATUS

[Date of request for examination]

23.01.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
